

Let's Celebrate our Community!

Wellness Survey

Grade 4 and 5 students are participating in the New Brunswick Health Council Student Wellness and Education Survey from November 18-25. Feedback from our Black Bears will help identify needs and assets in student wellness. Results of the survey will be made available in the future and used to make Nashwaak Valley School the Place to BE!

Let's Keep it to 50

Newly Paved Rte. 628
and Traffic Signs

Many of our little black bear students and their families live near our school. Being a rural area it can be dangerous to walk the road if motorists decide to speed. Community members are reminded that the speed limit in the school area is 50km/hr and are encouraged to slow down. Thanks for keeping our little bears safe!

NVS has a new basketball hoop! Many thanks to our Home and School members for their many contributions to make this project a reality.

A Special thanks to Mr. Tom Moss of Moss & Sons Ltd. for installing our new basketball hoop!

Did you know, you can access the outdoor facilities at NVS when school is out? Please visit and enjoy the hoops, Gaga ball pit, and forest playground!

NVS Core Leadership

NVS has a core leadership team responsible for implementing and improving learning outcomes. The team consists of Mrs. MacPherson, Mrs. Delaney-Thompson and Ms. Martin! School Improvement is their jam and they are participating in a new book study on; *The 4 Disciplines of Execution for Educators - Achieving Your Wildly Important Goal*.

Did you know you can access the current school curriculum online by visiting; https://www2.gnb.ca/content/gnb/en/departments/education/elcc/content/curriculum/curriculum_framework.html

BY THE BELL

In a commitment made in May of 2023 ASD-W has secured the organisation of Porter O'Brien to obtain feedback from families, staff, the public, and business community regarding the Wednesday/Friday scenario for elementary schools in Fredericton and Oromocto, and the impact this has on bell-schedules.

Consultants will collect information using an electronic anonymous survey to be shared with families, staff, community organizations, and other relevant stakeholders during the week of November 18, 2024. This survey will remain open until the end of the workday of Dec 20, 2024. So please check your email and take this opportunity to have your voices heard.

For those who wish to complete the survey but are unable to do so electronically, arrangements will be made at your local school to participate.

Get Outside Day at Nashwaak Valley School was held in partnership with Ducks Unlimited Canada Atlantic, Canadian Parks and Wilderness Society New Brunswick - CPAWS NB, The Nashwaak Watershed Association Inc. and The Gaia Project.

18 outdoor programs were delivered to all the classes in the school.

A very special Thank You to Francie at Nature NB.

Let's Bee Friends

Last month Gibson's dad Andrew visited Mrs. Kolada's class to talk about beekeeping. The kids were fascinated to learn about queen bees, had fun playing with the smoker, and got to sample some local honey. The class made a wonderful card for Andrew to thank him for his visit and share what they learned.

Gibson and Andrew Mathis
