FIGHTING HUNGER WITH FEEDNB

Nashwaak Valley is proud to be a FeedNB school! We know that hungry kids can't learn, so we help fuel their minds with nutritious breakfasts every day. Thanks to our amazing Home and School volunteers, Black Bears start their day ready to learn! FeedNB supports schools across the province with healthy options like fruits, veggies, whole grains, and proteins—giving students the energy they need to grow and succeed.

QUICK BRIEF: STUDENT HUNGER PROGRAM

Over 40 years ago, concerned citizens in Fredericton came together to fight hunger. On December 8, 1982, Fredericton Community Kitchens began serving noon meals. In 2014, a school lunch program was launched, now delivering hundreds of healthy lunches daily to 250–350 students across 18 schools—helping them learn and thrive. In partnership with 17 schools, we also provide 150–200 weekend food backpacks filled with non-perishables for students and their families. Nashwaak Valley School proudly participates in the Student Hunger – Lunch and Backpack Program. No Black Bears go hungry!

MEET OUR AST!

We're proud to have an Academic Support Teacher (AST) on our team! Mrs. MacPherson is helping students grow in both literacy and numeracy. As our AST, she works closely with classroom teachers to provide extra support where it's needed most—especially in literacy and numeracy. Through small group instruction and targeted interventions, students receive personalized help to build confidence and skills essential for academic success. These supports are based on student data and tailored to meet individual learning needs. Whether it's mastering multiplication and division, addition and subtraction, or improving reading fluency and comprehension, our AST, Mrs. MacPherson, is here to help every Black Bear thrive!
